

## Defaulting on the Dream: States Respond to America's Foreclosure Crisis

# Oklahoma

**ONE THIRD OF ALL MORTGAGES** issued in Oklahoma in 2005 and 2006 were subprime loans. As a result, one in 47 Oklahoma homeowners is projected to face foreclosure on their homes by the end of 2010. This is better than the U.S. average of one in 33 homeowners. Still, neighbors of foreclosed properties may lose on average more than \$1,500 in their property values as a result.

**ASSESSMENT:** Oklahoma has implemented some programs to try to address its foreclosure challenges. Its 2003 Home Ownership and Equity Protection Act seeks to curb high-cost lending and the state's counseling service works with current homeowners in danger of foreclosure.

### THE FORECLOSURE NUMBERS:

The projections above are from the Center for Responsible Lending's subprime spillover research, updated in February 2008. These estimates focus on foreclosures resulting from subprime loans made to owner-occupants in 2005 and 2006.
